| | | | | | | | | | | |
| | | | | | | | | | | |
| | | | | | | | | | | |

Medication given:

Give injection every 4 hours if:

- minimum urine output is 100 ml / 4 hours
- minimum respiratory rate is 12/ min
- Patella reflex is positive

If there are signs of overdose: stop magnesium sulfate and call medical assistance to administer the antidote (Calcium Gluconate, 1g IV)
