

# Over 3,000 in use around the world

### This Multipurpose Incinerator is used for:

- Remote Locations
- Mining Camps
- Job Sites
- Oil Drilling Operations
- Truck Stops
- Construction Sites
- Islands
- Barges
- Campsites
- Military Installations

EPA Approved for Small Batch Incineration

#### Smart Ash Burns:

- Oil Soaked Absorbent Materials
- Used Filters
- Waste Oil
- Paper Waste
- Wood By-Products
- Oily Rags, Gloves, Clothes
- Grease

1 LOAD DRUM

• Domestic Waste

The air powered Smart Ash uses no external fuel. Simply load a 55 gallon (208L), open head steel drum, light the load and clamp on the lid. A whirlwind of fire and intense heat is created inside the drum, burning your refuse with no smoke and no smell. Thousands of satisfied customers are currently using Smart Ash around the world to eliminate a wide variety of burnable waste materials. Combustion is complete, leaving ash equal to 3% by volume of the original load.

#### SPECIFICATIONS

Construction Requirements Weight Height Floor Space Average Burn Rate Requirements Electrical Location

	Stainless Steel Lid, Painted tubular Steel Frame, 2-Blowers, Axial
	Vane 120V standard or 220V optional
	55 Gallon (208L) Steel Open Head Drum
	96 lbs. (44 kg) Without Drum, 139 lbs. (63 kg) With Drum
	46" tall, (116 cm)
	(With Drum) 36" x 26" (91 x 66 cm)
te	50 lbs./HR (22 kg./HR)
	120volt or 220volt

Air pollution tests: Smart Ash has been tested following EPA testing formats. Federal EPA publication (Federal Register 40 CFR part 60) exempts Cyclonic Barrel Burner from State Emission Plans. Emission test data available upon request.

Exterior

2 ATTACH AIR HOSE - REST LID ON DRUM

3 IGNITE LOAD - TURN ON MINIMUM AIR

4 CLOSE & CLAMP LID

5 INCREASE AIR SUPPLY SLOWLY FIRE WILL BURN CLEAN

## Oil Away Attachment

#### An accessory for waste oil disposal and general incineration

The Oil Away Attachment is an accessory for the Smart Ash Incinerator. The Oil Away System injects waste oil into a burning Smart Ash and can be used for "wet" loads typically not burnable in the Smart Ash because the waste stream has high moisture content. Designed for loads with moisture contents above 15%, a Smart Ash with the Oil Away Attachment significantly increases the types of refuse and waste materials that can be burned. Waste oil is eliminated at rates up to 6 gallons (23 L) per hour.

#### Smart Ash with the Oil Away Attachment can burn:

- Waste Oil for Disposal
- Restaurant Waste
- Organic Materials
- Oily Rags, Gloves, Clothes
- Paper Waste
- Absorbent Materials
- Filters
- Wood By-Products
- General Non-Hazardous Waste

#### **Oil Away Attachment includes:**

- Metered pump (3-6 gallons per hour) (11 - 23 Liters/Hr)
- Hose to Riser
- Riser inside drum
- Nozzle
- Fittings and attachments

1000 CFM BLOWER

Located outside the facility, Smart Heat pulls cool air from inside the building and circulates heated air back into the building.

## Smart Ash success stories

Our Smart Ash portable incinerators have had fantastic success around the world. Customers have written telling us how great a job the Smart Ash does for them.

We are from the USCG Aids to Navigation Team and we would like to say that your Smart Ash is an excellent product. I suggested that we should have one due to our excess of waste products from the lighthouses. We now have two Smart Ash burners and we use them for all the trash that is included in the regulations. EM3 Richard Hoyt

Our company purchased an Elastec Incinerator and we are very pleased with the performance of the unit.

Management is quite satisfied with the results because it saves us disposal costs and leaves very little ash. It is a very good unit.

Rodrigo Bustamante – Maintenance Engineer Puerto Ventanas S.A.

Fantastic

We work at a remote Hydraulic Generating Station in Northern Manitoba. As part of an Environmental Management System initiative plan to minimize the effects of our waste stream, we bought a Smart Ash burner. It has proven itself beyond a doubt. It reduces piles of greasy oily rags to mere cups of ash with no smoke and the residue is harmless. I would recommend this product to anyone.

Don – Manitoba Hydro

The Smart Ash is a great product. It is very efficient and fast. Nothing is left but the metal part of the oil filters and a small amount of ash. We are very pleased with it.
